

CHARACTERÍSTICS

CROXON VELUR is a system panels absorbent tailored to provide exceptional decorative finish to the walls and the environment where they are located.

The panels are covered by a high quality acoustic fabric to be easily mounted on the walls and achieve a variable geometry and dynamics. Panels resistant to scratches and bumps.

SPECIFICATIONS

CROXON VELUR is a sandwich panel comprising a fibrous absorbent core between two semi-rigid panels. All made by recycled polyester fiber and of different densities covered by a fabric velour type of high quality for the reduction of reverberations.

Material	Croxonite and recycled polyester fiber
Fabric covering	Acoustic tissue Croxon Drap 204 Catalog in: www.croxon.es
Recyclability	100 %.
Fire reaction	B s1 d 0 (Euroclases).
Presentation (mm)	25 x 600 x 600. 25 x 600 x 1200 25 x 600 x 1800 25 x 600 x 2400 25 x 1200 x 1200 25 x 1200 x 2400 Others formats on request.

PROPIEDADES

CROXON VELUR has the following advantages:

- Very good sound absorption capacity at low, medium and high frequencies.
- Resists scratches, bumps and impacts.
- Its decorative finish and absorbing properties provide acoustic comfort and aesthetic exceptional.
- Acoustic tissue with a wide range of colours.
- Panels are designed for a very long shelf life.
- Very easy to install and reinstall elsewhere.

APLICACIONES

CROXON VELUR panels are used for acoustic preparation of meeting rooms, offices, hotel rooms, lobbies, corridors, shops, health centres, leisure and especially in areas where the movement of people is important.

For the versatility of the product and its manufacturing processes can be combined in any format.

Architects, interior designers and acoustic engineers can create their own designs and decorative acoustic, given the flexibility in their production.

MOUNTING SYSTEM

Z Metallic profile hidden.
