

## PRESENTATION

The whole square panels for walls and ceilings TALOS CONCEPT help reduce reverberation and create attractive and comfortable public spaces.

When manufactured in different thicknesses, provide design and create endless harmonic surface textures where comfort and aesthetics are essential.

## FEATURES

TALOS CONCEPT TALOS acoustical panels are formed by an absorbent core and a stiffened structure, both of the same material, polyester wool, recycled and recyclable. These elements are hidden. The face and edges are covered by an acoustic fabric and are presented in three formats.

By their formats and designs and aesthetic, like alone or grouped, are suitable for open spaces such as restaurants, reception areas, meeting rooms, offices, calls centers, etc.

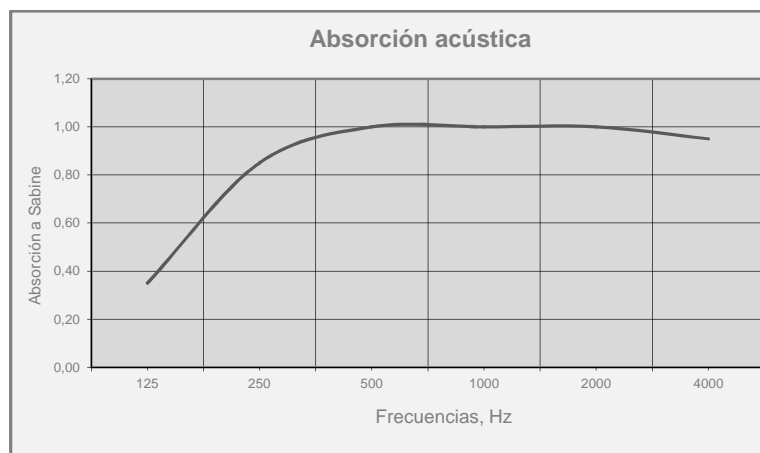

## FORMATS

TALOS CONCEPT panels are presented in the following measures:

Presentation		
Thin (mm)	Medium (mm)	Gross (mm)
30 x 400 x 400	60 x 400 x 400	100 x 400 x 400
30 x 400 x 800	60 x 400 x 800	100 x 400 x 800
30 x 800 x 800	60 x 800 x 800	100 x 800 x 800

## ACOUSTIC PROPERTIES:
